Supplemental Financial Information, Non-GAAP Financial Measures, and Other Metrics
(ASC 606)

Statement Regarding Use of Non-GAAP Financial Measures:

This supplemental financial information contains certain non-GAAP financial measures and other metrics. This presentation contains our reconciliation of those non-GAAP measures and other financial metrics.

We report non-GAAP financial measures in addition to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP.

Our non-GAAP presentation of gross profit, gross margin, operating expenses, operating loss, other net income (expense), net, net loss and net loss per share measures exclude stock-based compensation expense, charitable contributions, amortization of acquired intangibles and amortization of debt discount.

We present current calculated billings as total revenue plus the change in current deferred revenue and the change in current unbilled receivables during the period, and we present calculated billings as total revenue plus the change in total deferred revenue and the change in total unbilled receivables during the period. Trailing 12-months calculated billings represent the sum of the last four quarters of calculated billings.

Free cash flow, which is a non-GAAP financial measure, is calculated as net cash used in operating activities, reduced by purchases of property and equipment and capitalized internal-use software costs. Free cash flow margin is calculated as free cash flow as a percentage of total revenues.

Our dollar-based retention rate is based upon our Annual Contract Value (ACV). ACV for a customer is calculated based on the terms of that customer's contract and represents the total contracted annual subscription amount as of that period end. We calculate our dollar-based retention rate as of a period end by starting with the ACV from all customers as of twelve months prior to such period end, or Prior Period ACV. We then calculate the ACV from these same customers as of the current period end, or Current Period ACV. Current Period ACV includes any upsells and is net of contraction or attrition over the trailing twelve months but excludes revenue from new customers in the current period. We then divide the total Current Period ACV by the total Prior Period ACV to arrive at our dollar-based retention rate.

We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance, and assists in comparisons with other companies, some of which use similar non-GAAP financial information to supplement their GAAP results.

The non-GAAP financial information is presented for supplemental informational purposes only, and should not be considered a substitute for financial information presented in accordance with GAAP, and may be different from similarly-titled non-GAAP measures used by other companies. The principal limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by GAAP to be recorded in our financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgment by our management about which expenses and income are excluded or included in determining these non-GAAP financial measures. A reconciliation is provided below for each non-GAAP financial measure to the most directly comparable financial measure stated in accordance with GAAP.

Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures, and not to rely on any single financial measure to evaluate our business. Please see the tables included in this presentation for the reconciliation of GAAP and non-GAAP results.
