Item 8.01 – Other Events

This filing amends Item 8.01 of the Current Report on Form 8-K of Okta, Inc. (the “Company”) filed on March 25, 2022 (the “Prior 8-K”).

The Company has concluded its investigation into the January 2022 compromise of its third-party vendor. The Company is now able to conclude that the impact of the incident was significantly less than the maximum potential impact that the Company initially shared in the Prior 8-K. The Company continues to not consider the incident to be material. The final forensic report of the cybersecurity firm the Company engaged concluded that:

- The threat actor actively controlled a single workstation used by a third-party vendor’s support engineer, with access to Company resources.
- Such control lasted for 25 consecutive minutes on January 21, 2022.
- During that limited window of time, the threat actor accessed two active customer tenants within the SuperUser application and viewed limited additional information in certain other applications like Slack and Jira that cannot be used to perform actions in Company customer tenants.
- The threat actor was unable to successfully perform any configuration changes, multi-factor authentication or password resets, or customer support “impersonation” events.
- The threat actor was unable to authenticate directly to any Company accounts.
